PROJECTS

EpistemicAgent | *Python, OpenRouter, ChromaDB, Google Colab*

- Built a **two-agent system** (Reader Agent + Mood Regulator with a custom heat-rate vector) for autonomous news reading and self-regulated reaction modeling
- Used **ChromaDB with INT8 quantization** (QJL-inspired) for compressed long-term memory, with Google Drive checkpointing for persistence across sessions
- Ran on free-tier LLMs via OpenRouter (primary: Hermes 3 405B), demonstrating agent design under tight compute/cost constraints

Skincare Vision Agent | *Python, FastAPI, YOLOv8, ONNX Runtime, MediaPipe* Next.js, TypeScript

- Fine-tuned **YOLOv8n** on the ACNE04 dataset and exported to **ONNX Runtime** for real-time on-device inference
- Integrated **MediaPipe FaceMesh** (468-point landmark tracking) with a **FastAPI + WebSockets** backend handling backpressure for live video streams
- Layered an LLM-based recommendation agent on top of vision output, shipping an end-to-end product, not just a model notebook

Vector Space Explorer | *Python, FastAPI, Plotly.js* Next.js, TypeScript

- Built a browser-based tool for **interactive 3D visualization** of ChromaDB collections (PCA → UMAP/t-SNE → HDBSCAN clustering)
- Generated a synthetic arXiv abstract corpus (2,000+ entries) to stress-test the pipeline at scale

SKILLS

Languages : Python, TypeScript, JavaScript, C++, C, SQL

Frameworks : React, Next.js, FastAPI, WebSocket

AI / ML : LLM Agents, LangChain (working knowledge), OpenRouter, YOLOv8, ONNX Runtime, OpenCLIP, MediaPipe

Data / Infra : PostgreSQL, Supabase, ChromaDB, Docker

Cloud : AWS (EC2, S3, VPC, Elastic Beanstalk)

EDUCATION

VIT Bhopal University 2023 – 2027

B.Tech, Computer Science & Engineering (Cloud Computing & Automation) Bhopal, India

- Final-year student**; coursework includes Cloud Computing, Distributed Systems, Algorithms, Databases, Machine Learning

EXPERIENCE

Clever Harvey

Business Development Intern Remote

- Analyzed market trends and customer data to identify new partnership opportunities, contributing to a **15% increase in qualified leads** for the tech education platform
- Collaborated with cross-functional marketing and product teams to align business strategy with customer feedback and product capabilities
- Translated product value and technical concepts for potential clients into actionable insights for the development team
