EXPERIENCE

Clever Harvey

Business Development Intern
[LOR]

Business Development Intern

- Analyzed market trends and customer data to identify new partnership opportunities, contributing to a **15% increase in qualified leads** for the tech education platform
- Collaborated with cross-functional marketing and product teams to align business strategy with customer feedback and product capabilities
- Translated product value and technical concepts for potential clients into actionable insights for the development team — sitting directly at the product/customer interface
- Completed a Junior MBA (Clever Harvey), covering business strategy and operations fundamentals

PROJECTS

RoadAhead — Career Guidance App [repo] | [demo] | *Flutter, Dart*

- Built a **Flutter** app guiding rural Class 9–10 students through career decisions via a decision-tree questionnaire, generating personalized recommendations and roadmaps
- Implemented Material Design 3 UI and an authentication flow; deployed a working web build for live demo

F(x) Scale [repo] | [demo] | *Python, NumPy, Signal Processing*

- Built an image transformation tool applying **Fourier Transform** for frequency-domain filtering and **K-means clustering** for color quantization/segmentation
- Deployed as a live web app — full pipeline from signal processing math to a usable, shipped UI

TurboQuant — Quantized LLM Inference [repo] | *Python, PyTorch, GPT-2*

- Implemented **QJL-inspired low-bit quantization** (4-bit, 3-bit) for GPT-2 inference from a research paper, benchmarking real accuracy/latency trade-offs (FP32 PPL 40.48 → 4-bit 45.78 → 3-bit 76.29)
- Debugged numerical instability and calibration issues in the quantization pipeline end-to-end

EpistemicAgent *Python, ChromaDB, Multi-Agent LLM Systems*

- Designed a **two-agent autonomous system** (Reader Agent + Mood Regulator) simulating worldview formation over hundreds of iterative cycles
- Implemented **INT8 quantization** for ChromaDB memory compression, built from reading a research paper rather than an off-the-shelf library

SKILLS

Languages : Python, TypeScript, JavaScript, Dart, C++, C, SQL

Frameworks : Flutter, FastAPI, WebSocket, React, Next.js

AI / ML : PyTorch, TensorFlow/Keras, Computer Vision, YOLOv8, ONNX Runtime, Quantization

Data / Infra : ChromaDB, PostgreSQL, Supabase, Docker, REST APIs, Git

Cloud : AWS (EC2, S3, VPC, Elastic Beanstalk)

EDUCATION

VIT Bhopal University

2023 – 2027

B.Tech, Computer Science & Engineering (Cloud Computing & Automation)

Bhopal, India

- Final-year student**; coursework includes Cloud Computing, Distributed Systems, Algorithms, Databases, Machine Learning
